1 in 5 are at risk

- **Reduces radiation by 80%**
- **Faster and safer for patients**
- **Clearer image technology**

According to the American Heart Association, heart disease affects more than 60 million Americans. This equates to one in five people having some type of heart disease. For this reason, CVA has put great emphasis on preventive and safe care. The latest advances in 64 slice CT scanning, called the **Step and Shoot**, gives us the ability to better diagnose cardiac disease with dramatically less radiation.
